

C O N F O R F o a m s

C O N F O R ergonomic foams offer a unique combination of physical characteristics, high energy-absorption properties and temperature-softening behavior. They exhibit unusually low compression set for their low-rebound, highly damped properties. They also provide good energy absorption—up to 97 percent without bottoming out.

CONFOR foams soften on contact with a warm surface—allowing uniform pressure distribution and firm, yet fluid, support. They are ideal for healthcare applications.

CONFOR foams can provide flexible protection in a variety of *cushioning applications*, from body contact padding to electronics packaging.

- Energy absorbent
- Low rebound
- Temperature-responsive
- Ideal for ergonomic applications
- Lighter, lower density formulations available for specialty applications
- Custom thicknesses also available

Family	Product	Thick (in) (unless indicated)	Size (in) (unless indicated)	Unit	Weight (lb/sq ft)
